

Introduce yourself and tell us why you chose this course

Hi, my name is Abdulkarim. I am from Dandeli, Karnataka. I did my schoolings at Janata Vidyalaya. I have earned my diploma in electronics and communication from Tippu Shahied institute of Technology, and I have pursued my graduation from Gogte Institute of Technology in the field of electronics and communication in 2020 with an aggregate of 8.3 CGPA. I live in a small family that consists of 5 members. My father is a worker in West coast Paper mill PVT.ltd, and my mother is a housewife. I have an elder brother and an elder sister. My brother works as a network marketer and my sister is a doctor. I love interacting with people, learning new things, traveling, and exploring new places. I love challenges. I believe in learning from every single person. It doesn't matter whether the person is younger or elder to me. The only thing that matters to me is knowledge.

Nowadays data is something that everyone is dependent on. And the data scientists are the ones who handle the data and tries to modify it so that new and interesting thing comes out. It is in demand, it is not going to be boring like other jobs, and it is always challenging. That's the reason why I opted to join this course. The reason behind joining Edyoda was the genuine selection procedure and feedback of X students.
